

ADACHI Shinya
Mayor of Oita

Blessed with lush green mountains, a blue sea, crystal-clear rivers, and a moderate climate, Oita City has long played an important role as a key hub in eastern Kyushu. The city actively traded with overseas countries under the leadership of Otomo Sorin, a territorial lord during the Sengoku Period (1467-1590). Oita City was designated by the national government as a new industrial city in 1964 which led to the significant growth of its industrial concentration, and later on became a core city in 1997. Through the mergers of Saganoseki and Notsuharu towns in 2005, the city has made great strides as a prefectural capital full of vitality equipped with diverse functions in various fields such as industries, education, and welfare.

Meanwhile, the city's population has continued to decline since 2017 and has been actively tackling the issues of declining birthrate. In addition, the city has been able to keep the number of fatalities caused by natural disasters at zero for the past 30 years. In response to the significant damage caused by frequently occurring natural disasters nationwide, it is necessary to establish measures for the widest possible range of risks to develop a city that can better withstand disasters. Furthermore, it has become more important for local governments to fully utilize the capabilities and individualities of its diverse human resources due to the significant changes in social and economic conditions such as the diversification of values in society and the progression of digitalization. Under such circumstances, Oita City has established five major goals for development: protecting citizens, nurturing citizens, supporting citizens, providing a thriving environment for citizens, and promoting the well-being of citizens. These goals are based on the fundamental concept of approaching individual citizens with sincerity by putting them first. Thus, we are committed to managing the municipal administration to ensure Oita City's development that both current and future citizens can take pride in.

We advance city development through an understanding of the diversity of individuality and gathering the strength of a wide variety of organizations in the city into Team Oita. We look forward to your continuing encouragement and support as we work to achieve the goals of Oita City.

Comprehensive support from pregnancy and childbirth through to higher education

Since April 2024, Oita City has waived childcare fees for second and subsequent children from birth to two years of age at non-accredited childcare centers for those in need.

From April 2024, Oita City expanded eligibility for financial support for medical expenses for children through high school.

Establishing reliable and safe medical care and disaster response systems

Oita Fire Command Center

In response to the increasing intensity and scale of disasters, the Oita Fire Command Center was established to unify command operations throughout the prefecture.

Terrain

Oita City is surrounded by abundant nature, with Beppu Bay to the north and Mt. Takasaki, Mt. Yoroigadake, Mt. Ryozen, Mt. Kurokui, and Mt. Mominoki in other directions. These natural landscapes and forests cover about half of the city's total area. The major rivers, Oita River and Ono River, flow through the city from north to south, winding through mountains and nourishing the central Oita Plain.

The deep northern coastal waters have attracted major Japanese companies, leading to the development of a thriving seaside industrial area. To the east, the coast facing the Hoyo Strait features a ria coastline that serves as a wonderful natural port. These geographical advantages have enabled Oita City to become an excellent urban environment where people and nature coexist in harmony.

City Overview

A city in harmony with nature

It is one of the well-known industrial areas stretching along the coastline of the Seto Inland Sea. The Oita River and the Ono River, two major waterways in the region, nourish the surrounding nature, bringing wealth and comfort to the residents. The harmony between the city and nature is integral to our way of life, and our development has thrived within this balance.
